Dear [Company] hiring team,

I build production AI apps end to end, on my own. A few that are live right now: an AI phone assistant with voice and memory, an AI clone that gives advice in my own voice, a SaaS with billing and an automated content pipeline, and a custom AI music site.

My stack is TypeScript, Next.js, Convex, Vapi, and Stripe. I have a security background and I document everything, so what I build keeps running whether I’m in the room or not.

For [Company]’s [Role], I’d love to help you ship [what you’re building]. You can see the work at contra.com/andre_thomas_sczm465o, or talk to my AI clone directly at chat.dreythomas.com.

Best,

Drey (Andre Thomas)
