

Drey Thomas

I build production AI systems — solo, shipped, and live.

dreydrey9000@gmail.com · contra.com/andre_thomas_sczm465o · chat.dreythomas.com

SUMMARY

I take an idea and ship the whole thing — front end, backend, voice layer, billing, deploy — usually solo, on Claude Code. I move fast, document while I build, and test my own work before anyone sees it. Came up running operations (built a full VA system from zero), so I build software the same way: **airtight enough to run without me**. Security background, so auth and not-leaking-data are defaults.

SELECTED WORK — ALL LIVE

Dottie — AI Phone Assistant

Answers a real phone line in a natural voice, books meetings, texts back — with memory across calls.

Vapi · Convex
dottie.dreythomas.com

Pocket Drey — AI Clone

Chat assistant trained on how I build; gives advice, captures leads, tracks the funnel.

Next · Convex · PostHog
chat.dreythomas.com

1BB — AI Content SaaS

Membership platform + recurring billing + posting engine + an AI pipeline that runs on autopilot.

Next · Convex · Stripe
1buttonbusiness.com

DR. DREY — AI Music Site

Custom web player: album browsing, shuffle, continuous play, resume-where-you-left-off.

Next · TypeScript

EXPERIENCE

Independent Builder — AI

2024 — now

Design + ship production AI apps end to end: voice assistants, AI clones, full-stack SaaS, automation pipelines. 5 live products + self-running systems (multi-source job feed, data-ingesting admin dashboards).

Viral Editz — Acct Mgr / Ops Lead

ongoing

Run 5 creator/brand accounts + an 8-10 person VA team. Architected the pod + onboarding system so it trains people instead of the reverse — now expanding company-wide.
